ONE PAGE SUMMARY

ABOUT

I am C. Renu Sri, a Computer Science and Engineering B.Tech student, maintaining a CGPA of 9.4. I integrate a robust academic foundation with hands-on experience acquired from internships at Ilander Technologies, Indian Servers, and Indo-Euro Synchronization. Proficient in programming languages such as Python, C, and SQL, I demonstrate proficiency in software development, web development, and effective problem-solving.

INTERNSHIPS AND PROJECTS

Throughout my internships, I immersed myself in diverse domains, significantly enhancing my skill set. In a 3-month Data Science internship, I successfully completed a rigorous program, gaining comprehensive knowledge of various tools utilized in data science. During the 6-month Web Development internship, I acquired expertise in developing dynamic websites. In the NLP internship, I focused on Model training and fine-tuning. As part of this journey, I made significant contributions, including successfully training a Machine Learning model and developing a chatbot using NLP.

INTERESTED IN

I've come here to explore emerging technologies and seek guidance for my upcoming project. My objective is to actively contribute to the innovation and expansion of the tech industry, channeling my passion for data science and adept problem-solving to craft impactful solutions. I eagerly look forward to the mentorship and insights that will be provided on this journey.
